

CS-72E/74E

master view™ 2/4 Port PS/2 KVM Switch

The CS-72E / CS-74E KVM (Keyboard, Video, Mouse) switch is a control unit that allows access to two (CS-72E) or four (CS-74E) computers from a single console (keyboard, monitor, and mouse). With its custom designed connectors, the CS-72E / CS-74E significantly reduces the number of ports required for a 2 or 4 port KVM switch. The design features a custom SPHD-15 male connector for the keyboard, video, and mouse, and SPHD-15 female connectors for the cables that connect the switch to the computers.
