

VE600A

DVI Extender with Audio

The VE600A DVI Extender with Audio extends your DVI display up to 60 m away from your DVI source using Cat 5e cables. The use of Cat 5e cables provides a simple and reliable connection method that takes advantage of the wiring system in most modern office buildings. The VE600A incorporates ATEN's technology that allows the A/V signal to be transmitted over one Cat 5e cable. If the real EDID is required, simply use a second Cat 5e cable. With stereo audio support and support for popular widescreen formats, the VE600A provides crystal-clear image and sound quality in all installations where remote DVI video displays are required.

Setup

Features

- Extends the distance between DVI source and DVI display device
- Long distance transmission – up to 60 m
- Uses Cat 5e cable to connect the local and remote units
- Features ATEN EDID technology that allows transmission over one Cat 5e cable
- Superior video quality – up to 1920x1200 (40 m); 1080i (60 m); 1080p (40 m)
- Audio enabled
- Adjustable EQ compensation control
- Supports widescreen formats
- Rack mountable
- HDCP Compatible
